

powergalv

powergalv – the one-stop-shop for powder coating on galvanized steel

Protection

Powergalv gives a high degree of protection to architectural metal work. Powergalv includes galvanizing to **BS EN ISO1461** and chemical pre-treatment to BS 6497 (BS EN 13438). When using these pre-treatments the duplex system offers long lasting protection and we can offer a guarantee of up to 25 years.

Smoothness

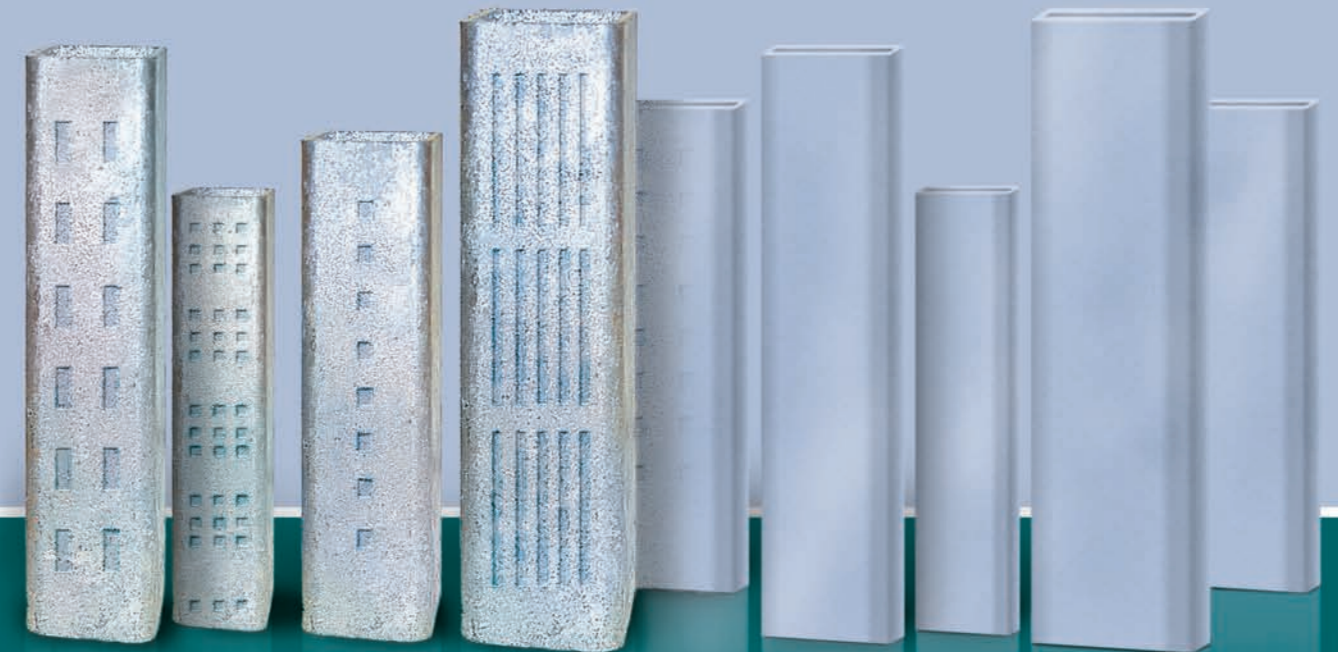

Powergalv offers a very smooth surface giving a superior finish to enhance the look, feel and performance of architectural metalwork specifically developed for critical and prestigious applications. Fettling comes as standard and there is optional additional surface preparation for the ultimate finish.

Uniformity

Powergalv ensures a uniform finish and performance. Bespoke process plans, consistent operating procedures approved to ISO 9001:2000 ensure an ongoing quality from piece to piece, batch to batch and year to year.

Powergalv offers the complete galvanizing and powder coating service to meet the needs of business success in the 21st Century.

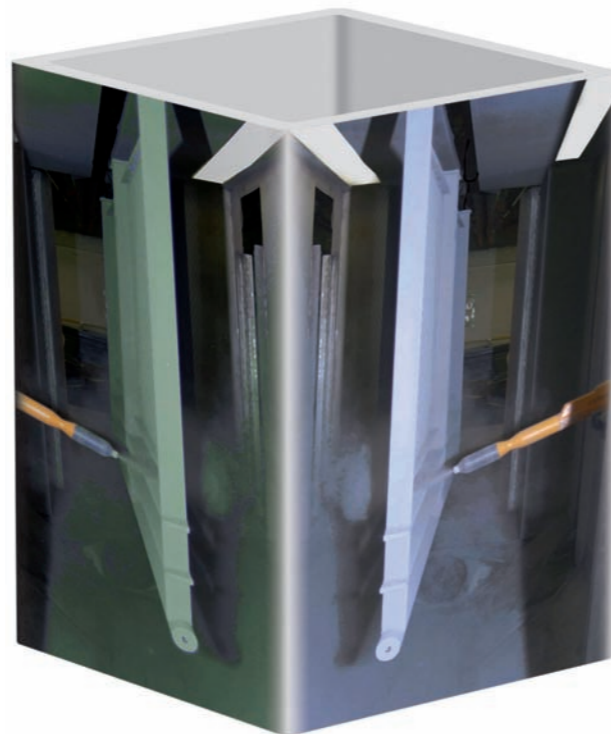

One-Stop-Shop

We are a one-stop finishing service for architectural steel. As you know, it's a competitive world and successful businesses rely upon suppliers who understand them. Powergalv offers support, help and advice to appreciate, understand and contribute to your business requirements.

From the moment your enquiry arrives our team applies their experience, contacts and many years of knowledge to your project. We tailor our process to give you a finishing solution that meets your needs and the needs of your customer.

Dedicated support

Close internal links and face to face contact with our production staff help Powdertech quickly gain an understanding of your business. This personal service means you can depend on us for advice and quality of work.

At Powdertech we know the importance of timing and turnaround. Our dedicated transport is ready to collect and deliver your work to meet with your schedule.

Service led

Our next day delivery is especially useful for those tight squeezes and rush jobs that we know happen from time to time. You can be sure that every time you phone there will be someone happy to talk to you about your latest project.

The Powergalv service is based at our modern facility in Corby. Our processes meet the requirements of BS EN 12206 (powder coating on aluminium) and BS EN 13438 (powder coating on galvanized steel).

Quality products

Our quality management system is approved to ISO 9001:2000 and we operate a product and quality tracking system from enquiry through to delivery. All staff are trained in quality assurance techniques and are aware of how important quality is to you. From small one off projects through to large contracts our care and attention to detail will be to the highest standards. We take great pride in what we do.
